ADVANCED TOOL AND EQUIPMENT MANAGEMENT SOFTWARE

AllTrak™ Cloud Asset Management Solution

AllTrak Cloud is a leader in tool and equipment management software for use in the warehouse and the job site

⊕ Trimble®

ALLTRAK™ CLOUD

Trimble's AllTrak Cloud lets contractors locate tools and see who is responsible for them. See what tools require servicing, what consumables are running low, and gain insight into usage. With AllTrak Cloud, you always know where your tools and equipment are and who is responsible for them.

Prevent loss, theft and damage

**Quickly find who has a certain asset**

Tag tools and equipment for tracking

Locate assets from anywhere on any device

Report on asset usage and costs

Simpler inventory management

▶ Warehouse Asset Management

AllTrak Cloud helps you manage availability, quantity, and accountability of your equipment, tools, and consumables.

Assign tools and equipment to workers, jobsites, or projects. Check tools, equipment, and consumables in and out of your warehouse and see equipment status, including losses, damages, and who was responsible.

Improve inventory tracking of returned items and run reports on the best performing tools and equipment for informed future purchasing.

▶ Track Tool Costs On A Project

Improve cost visibility from the office with a record of tool and equipment use.

Estimate costs with reports showing equipment location and time on site. Increase efficiency by cutting down on deliveries or purchases and reduce losses from theft or damage by assigning individual responsibility.

Ensure improved management of costs and accuracy of project cost analysis.

▶ Locate Tools In The Field

Quickly find tools and equipment in the field or at the warehouse faster.

Locate the tool you need with a quick search on your mobile device, saving time typically lost looking for a tool or asset.

Stop buying tools you already own because they are at the wrong site and ensure only properly qualified workers use certain tools.

▶ Rentals, Servicing, Calibration, and Certification

Stay on top of tool maintenance and rentals with regular, automated reminders.

Keep tools compliant and increase safety with automated service alerts. Ensure safety equipment is properly calibrated and certified and make sure rentals are returned on time through due-date alerts and reminders.

▶ Simpler Reporting

Effectively connect tool and equipment costs to individual projects.

Track on-site equipment and tool deployment time to better understand project costs. See all consumables used on a project or site and create reports on true project costs.

Export and share PDF and Excel reports for review and analysis. Use this data to improve asset usage and pin point areas of hoarding, waste or inefficient use.
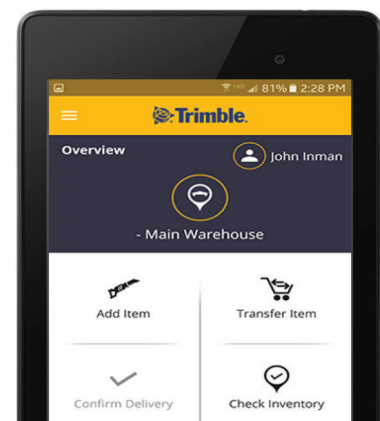

▶ Complete Mobile Functionality

Track inventory, assign or transfer assets or find the tools or equipment you need through your mobile phone or tablet.

Using the dedicated app, you can manage your warehouse or crib inventory by adding and receiving assets.

If you're in the field, reduce the time spent searching for tools by using your phone to find the nearest one and who has it.
